

Dan Davison

Game Programmer

dandavison.co.uk, github.com/d-davison, linkedin.com/in/davisondan/

Summary

Unity and Unreal Engine developer with 5+ years' experience shipping games and interactive apps across mobile, PC and console. Comfortable across UI systems, gameplay programming, multiplayer networking, AR/VR and tooling, with a track record of owning features end-to-end on small teams.

Technical Skills

- **Engines:** Unity (UI Toolkit, UGUI, Addressables, Remote Config), Unreal Engine (UMG, Blueprints)
- **Languages:** C#, C++.
- **Gameplay & Systems:** UI/UX systems, multiplayer networking (Mirror, FishNet, EOS), gameplay programming, accessibility, localisation.
- **AR/VR:** ARCore, ARKit, WebGL
- **Platforms:** PC, iOS, Android, Console (Xbox / Switch) — including porting, optimisation and certification
- **Tooling:** Custom Unity editor tooling and workflow tools
- **Workflow:** Git, Plastic, Perforce, Agile/Scrum, sprint planning, code review

Employment History

Binary Spiders

Milton Keynes, Remote

Jan 2025 - Present

(1 year, 6 month)

Mid-Level Programmer

- Shipped Sledding Game to Xbox, Nintendo Switch 2, and mobile (iOS and Android), a day one Xbox Game Pass title that also sold over 100,000 copies and peaked at over 5,000 daily players.
- Improved cross-platform stability and performance, meeting platform-specific certification requirements.
- Developed an Augmented Reality murder mystery experience for Explora Journeys using Unity and WebGL, collaborating directly with clients to ensure seamless integration and high engagement.
- Developed sophisticated, responsive user interfaces inside Unreal Engine for an upcoming cooperative horror title, ensuring consistent UX across PC and console platforms while integrating gameplay systems, accessibility features and localisation.

JOSTL. (*Social Match Play Ltd*),

London/Hybrid

Feb 2022 - Jan 2025

(2 years, 10 months)

Unity UI Developer (October 2023 - Jan 2025),

Junior Unity UI Developer (February 2022 - October 2023)

- Sole Unity UI Developer in a small dev team of 3, working on an interactive, game-like sports fan engagement app.
- First front-end hire working directly with co-founder/CTO. Promoted within 18 months following organic expansion of role and ownership of additional responsibilities.
- Primary responsibility for the design and development of complex UI systems inside Unity Engine, focused on creating a seamless, responsive User Experience.
- Worked cross-function to plan sprints, scope team-wide tasks, and manage the bug-list.
- Designed and developed multiple mechanics based on my own feedback of the app, and from analysing the applications analytics, including new navigation panels

Cosmico

London

Sept 2021 - Feb 2022

(6 months)

Junior Unity Developer

Dan Davison

Game Programmer

dandavison.co.uk, github.com/d-davison, linkedin.com/in/davisondan/

- Worked collaboratively within a development team of five to create an innovative open-world eLearning app.

Developed engaging educational mini-games designed to assess and enhance children's STEM skills.

- Created mini-games focused on improving maths and English skills, incorporating adaptive mechanics to monitor player performance and dynamically adjust difficulty levels.
- Utilised Unity's Addressable system and Remote Config for dynamic content management, ensuring flexibility and adaptability.
- Participated in agile sprint cycles, providing and receiving constructive feedback on pull requests to maintain high code quality and foster continuous improvement.

Altran Italia SpA

Milan

Jul 2019 - Dec 2019

(6 months)

XR Developer Intern, Altran Italia SpA, Milan

- Developed AR use-cases for clients in Unity using ARCore and internal technologies, then produced video content ready for client feedback.
- Researched and developed mechanics such as video streaming and machine learning which were then fed back to the development team and implemented into AR applications.

Education

University of Greenwich, London

- 1st Class Honours in BSc Games Design and Development with Industrial Placement
